

Radar Technician in Mexico

TSS Solutions, a worldwide engineering and technical services provider for the commercial and government sectors specializing in Satellite, Radar, and Depot Repair Solutions, has an opening for a radar technician with experience on any of the following radars: AN/TPS-43E, TPS-63, TPS-70, TPS-73, TPS-75 or TPS-78. Travel within Mexico will be required.

Selected applicants will:

Have U.S. Citizenship

Have a SECRET level Government Security Investigation or can obtain one

Have 3 years minimum of hands-on experience supporting one or more of the following:

AN/TPS 43E / AN/TPS 63 / AN/TPS 70 / AN/TPS 73 / AN/TPS 75 / AN/TPS 78

Experience working with property control, logistics, and quality standards

Possess and maintain ability to lift 50 lbs.

Possess and maintain ability to work various shifts, overtime, weekends, holidays, etc., as required

Valid U.S. passport required

Responsibilities include:

Perform Preventative Maintenance and Corrective Maintenance activities on the RADAR and all prime mission equipment

Provide training to personnel on RADAR operation and maintenance when required

Monitor in-country parts usage and ensure that an adequate amount of RADAR and prime mission equipment parts are on site at all times

Track site RADAR work orders and aid in the completion of required reports

Perform inspections on the RADAR and prime mission equipment

Maintain RADAR and prime mission equipment historical records

Act as an in-country point of contact on site related matters

Monitor RADAR data quality

Track and monitor Test Equipment (TMDE) calibration intervals

Maintain RADAR related publications and Technical Orders

Maintain objective quality evidence including configuration documentation and other records as required

Perform additional duties as needed to accomplish project requirements as directed by the site manager

Position is assigned to a remote location with no family accommodations
